

SAKTHI PRAKASH V

Front End Developer

+91 9092815122 sakthiprakash0077@gmail.com Madurai

SUMMARY

I am a dedicated Full Stack Developer with a strong background in building scalable web applications. With hands-on experience in both frontend and backend technologies, I focus on performance, automation, and enhancing user experiences. My passion for technology drives me to develop solutions that improve productivity and reduce manual efforts

EXPERIENCE

Server Side Developer

JK Fenner (India) Ltd – IT Department

12/2024 Madurai

IT Department focusing on backend development and system efficiency

- Developed and maintained backend applications for internal systems
- Automated report generation processes, reducing manual workload
- Worked on data processing and server-side logic optimization
- Improved system efficiency through automation and scripting

Junior Web Developer

MeenTech Solutions

08/2024 - 11/2024 Bangalore

A web development company specializing in innovative solutions

- Designed and developed responsive web applications
- Built UI components using modern frontend technologies
- Collaborated with backend team for API integration

EDUCATION

B.Sc Information Technology

The Madura College

01/2021 - 12/2024 Madurai

SKILLS

Responsive Web	HTML	JavaScript	PHP	Python
Streamlit	Atom			

STRENGTHS

Focus on User Experience

Dedicated to improving user experience through effective solutions

PROJECTS

AI Chatbot Application

An application that simulates user interaction through AI technology to improve experience

- Developed an AI-powered chatbot using Python and Streamlit
- Implemented real-time user interaction with dynamic responses
- Integrated AI APIs for intelligent conversation handling
- Designed a user-friendly interface

Automatic Report Generation System

An automation tool designed to streamline report generation

- Built a Python-based automation tool to generate reports (PDF/Excel)
- Reduced manual report preparation time significantly
- Implemented data processing and formatting for accurate outputs
- Eliminated repetitive reporting tasks

ATM Management System

A project that simulates ATM functionalities to ensure secure transactions

- Developed a simulation of ATM operations
- Implemented secure transaction handling and authentication
- Features include balance check, withdrawal, and deposit
- Focused on reliability and data security

Food Restaurant Website

A web application designed for a restaurant to enhance customer interaction

- Created a responsive website using React JS
- Designed modern UI for better user experience
- Implemented menu display and ordering interface
- Optimized for mobile and desktop
